ownCloud for Users

Efstathios Iosifidis

iosifidis@opensuse.org

Need for cloud service

- Access files
- Access calendar
- Access mail
- Access contacts
- Easy sharing and collaboration
- All free!!!

The awesome cloud

Awesomeness of the cloud

- Accessible everywhere
- Back up online
- Easy sharing and collaboration
- All free!!!

  (or super cheap)

The awful cloud

Awfulness of the cloud

- Where is my data?
- Who can access my data?
- How is my data used?

Take back your data

Introducing ownCloud

- Sync and share
- Open Source
- Easy to use
- Easy to install
- Easy to extend
- >1.8 mln users

Sync and Share

- Multi-platform
- External Storage
  - FTP, NFS, WebDAV, dropbox, S3, …
  - Encryption
  - Versioning
- Sharing
  - Public links, passwords, expiring, upload rights
- Server to server sharing

Comparison

	Google Drive	One Drive (MS)	Dropbox	iCloud	ownCloud
Size	15GB	15GB	2GB	5GB	Unlimited
Calendar	Yes	Yes	No	Yes	Yes
Contacts	Yes	Yes	No	Yes	Yes
Extra	Google docs, Photos	Office online		Pages, Numbers, Keynote, Photos	Documents, Apps
Mail	Gmail	Outlook	No	Yes	Personal-APP
Clients	Mobile-PC	Mobile-PC	Mobile-PC	Mobile-PC	Mobile-PC
Safety	Google	Microsoft	Dropbox	Apple	**YOU**

Welcome to ownCloud: your self-hosted file sync and share solution.
ownCloud is open source file sync and share software for everyone from individuals operating the free ownCloud Community Edition, to large enterprises and service providers operating the ownCloud Enterprise Edition. ownCloud provides a safe, secure, and compliant file synchronization and sharing solution on servers that you control.
With ownCloud you can share one or more files and folders on your computer, and synchronize them with your ownCloud server. Place files in your local shared directories, and those files are immediately synchronized to the server and to other devices using the ownCloud Desktop Client. Not near a device running a desktop client? No problem! Simply log in using the ownCloud web client and manage your files from there. The ownCloud Android and iOS mobile applications enable you to browse, download, and upload photos and videos. On Android, you can also create, download, edit, and upload any other files, as long as the correct software is installed.
Whether you are using a mobile device, a workstation, or a web client, ownCloud provides the ability to put the right files in the right hands at the right time on any device with one simple-to-use, secure, private and controlled solution. After all, with ownCloud, it's Your Cloud, Your Data, Your Way.
Web Interface
The following topic contains a general overview how to access ownCloud from a web browser like Firefox, Chrome, or Internet Explorer:
The ownCloud Web Interface
File Access and Management
The following topics contain information about file access and management. Access information includes how to access your server using the ownCloud web interface or through the use of WebDAV shares (Linux or Mac OSX) or web folders (Windows):
Accessing your Files Using the Web Interface

Install | ownCloud.org

https://owncloud.org/install/#desktop

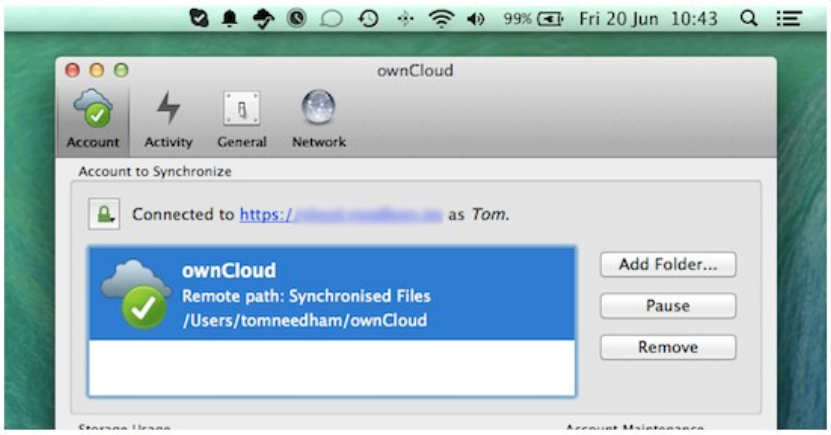
Install Desktop Clients

Latest stable version: 1.6.4 (Changelog)

Synchronise your ownCloud with your computer using our desktop clients. Select one or more directories on your local machine and always have access to your latest files wherever you are.

Windows	Mac	Linux
XP, Vista, 7 and 8	OSX 10.7+, 64 bit	Multiple distributions

Looking for the Sources (PGP signature)? For more information on the sync client, check out the documentation.



Install Mobile Apps

Mobile apps are available in both the Apple App Store and the Google Play Store, allowing you to access, sync and upload your data on the go.

Available on the App Store

ANDROID APP ON Google play

Looking for the Android Sources? Looking for F-Droid?

Integrate with your ownCloud

ownCloud is compatible with a large range of 3rd party applications and services. Use ownCloud to store your data and better integrate with your web

ownCloud in a box
Published by Cornelius Schumacher Based on openSUSE 13.1 32-bit x86 Homepage at http://owncloud.org
ownCloud in a box packages ownCloud as an appliance, so you can easily run it in a virtual environment, as a live system or install it on a disk.
Run the appliance, go to http://[yourservername]/owncloud, and follow the instructions there.
Also remember to change the root password of the system after the appliance has booted.
One note about the versioning of the appliance: The major version of the appliance follows the major version of ownCloud. The minor versions are not directly related. See the release notes for what exact minor version is included in the appliance.

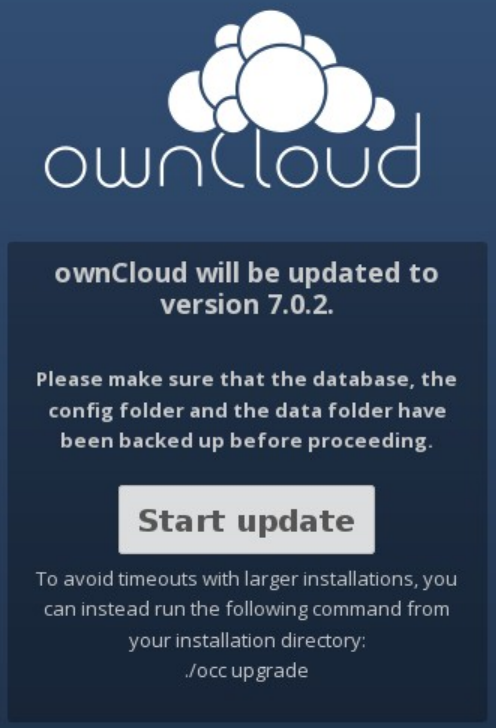
Cloud
Release notes
Upgraded to 7.0.2 and current updates of openSUSE 13.1.
There still is a bug in ownCloud which makes the test for WebDAV fail in Testdrive. Just ignore, if ownCloud says it can't do WebDAV, it can.
Release notes from ownCloud:
Version 7.0.2
Updated 12 days ago
Testdrive
Older releases
Version 7.0.1 – 81 days old
Version 6.0.5 – 116 days old
Version 6.0.4 – 173 days old
Version 6.0.2 – 239 days old
Version 6.0.1 – 291 days old
Version 6.0.0 – 317 days old
Version 5.0.12 – 408 days old
Version 5.0.11 – 456 days old
Version 5.0.7 – 494 days old
Version 5.0.6 – 522 days old
Version 5.0.5 – 544 days old
Version 5.0.1 – 576 days old
Version 4.5.15 – 611 days old

Upgrade



ownCloud
ownCloud will be updated to version 7.0.2.
Please make sure that the database, the config folder and the data folder have been backed up before proceeding.
Start update
To avoid timeouts with larger installations, you can instead run the following command from your installation directory:
./occ upgrade
ownCloud – web services under your control
